

# CALL TO NURSES

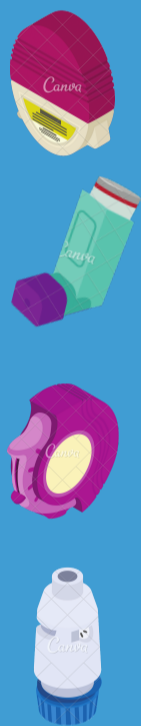

## RESPIRATORY PATIENTS NEED EDUCATION

Help them learn about their inhalers and keep them out of hospital.

up to 80% of patients use their inhalers **incorrectly**

1 in 4 patients have **never been taught** how to use their inhalers. Using their inhaler correctly can reduce morbidity and increase quality of life.

### Nurses need the correct information

With the amount of different inhalers available, it can be difficult to know how to use all types.

### How to videos

- ★ access free learning and teaching resources at the **National Asthma Council**
- ★ all device types demonstrated in brief videos

### Nurses

- TEACH
- OBSERVE
- REPEAT
- CELEBRATE
